

Chords for HTML symbols

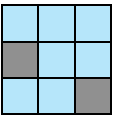

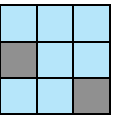

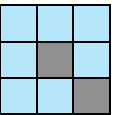

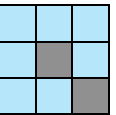

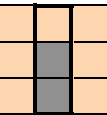

This is OK <  =  >  =  

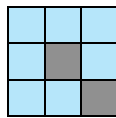

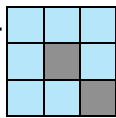

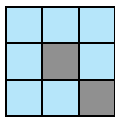

This is very frequent, as it terminates every tag. </>   =   
just move ring finger

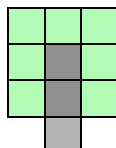

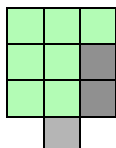

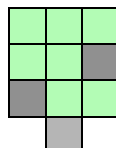

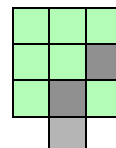

this is smblol sequence preceding a comment, could be fairlry common. Not too bad a chord sequence. Leave it as this four chord sequence. <!>   =    

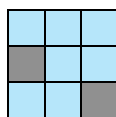

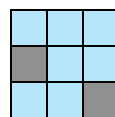

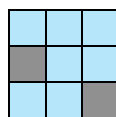

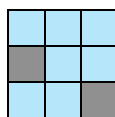

yes; this seems to be a common 4 symbol start for a comment. It's not too difficult to chord, but we may want to Macro it. <!-->    
Hold middle finger down while double keying ring finger

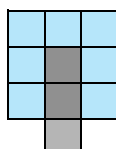

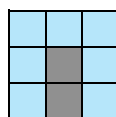

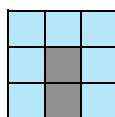

This seems to be the terminal symbol set for a comment. -->   
Hold middle finger down while double keying ring finger

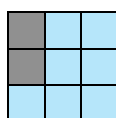

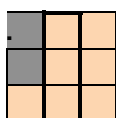

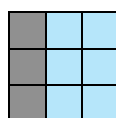

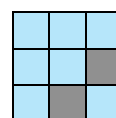

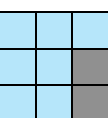

yes //-->     
Hold middle finger down while double keying ring finger

-  --  
Hold middle finger down while double keying ring finger

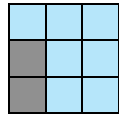

!  ?  "  ' 

/  ///   
Hold middle finger down while double keying ring finger

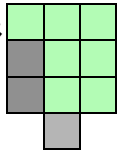

=  ==  
Hold middle finger down while double keying ring finger
