

Creating a Cheat Sheet for a symbol font like Zeal or Wingdings

1. From this folder, open the file CheatShet_FontMaster.xls in a spreadsheet program like Excel.
2. Select All. (In Excel, click the <> (diamond) cell in the top left hand corner.
3. Select the font you want. The characters change to symbols.
- 3a. Apple Macintosh fonts will be complete. If you need the special Windows symbols chorded with PostCaps or 3postCaps prefix, click in a purple cell then chord its prefix chords and then the chord for the cell. The correct character will be shown in the cell.
4. Print the page.

You now have a Cheat Sheet showing you the correct chording to get the symbols you want.

We have included a number of symbol cheat sheets.
